I In the past few years, people started planting community gardens. More and more people are finding land in their neighborhoods and growing gardens. They invite their neighbors and friends to join them. Together they plant fruit trees, vegetables and flowers. These gardens are popular today because people want to do things outside their homes. Also, many people want to grow their own fruits and vegetables. In addition, some people think it's healthier to eat the things that they grow instead of the things that they buy.

II Every neighborhood can plant a garden. It's easy and doesn't cost a lot of money. All you need is land, some seeds or young plants and people from the neighborhood who want to help. If you have questions, a professional gardener can give advice. Every city has professional gardeners who will teach you about the things you can plant and when the best time to plant them is.

III Community gardens have advantages, especially for children. In these gardens, children can spend time outside and feel free. Also, they can learn about the things they plant. They will be happy when they show their friends and family the potatoes and carrots and other things that they planted. In addition, parents often organize activities in the gardens for their children.

IV Lisa Michaels is a teacher. She loves the community garden in her neighborhood. She thinks that neighborhood gardening is a great idea for several reasons. One reason is that it makes you feel good to be outside. It is also an excellent way to get to know other people.
